

PROJECT MANAGEMENT COSTS

FACTORS AFFECTING THE REDUCTION OF PRODUCT DEVELOPMENT COSTS

Some key factors can even reduce the costs of your project

SIMPLICITY

It's a good idea to think about what features you really need and which ones can be omitted

You should provide your users with the right value but not overload them with a series of things

You will make your software easy to use

OUTSOURCING

You will pay different sums of money for the in-house team working hours and the services of an outsourcing partner
You will save time as you will not have to train a new group of coders as you would do with the new in-house team
You should go to companies resident in emergent countries (offshores – Ukraine, Romania, Far East,...)
